

### **Kuban campaign vers. 1.0:**

The campaign contains the following subcampaigns:

Kuban 1942: Rush for asia  
Kuban 1943: Kuban 1943  
Prohorovka 1943: Zitadelle  
Kuban fall 1943: Retreat from Kuban  
Crimea 1944

- historical correct plane set and skins for all units (if possible in IL“)
- Updated message files

The Kuban campaign was tested with IL2 1946 Pacific Fighters Vers. 4.08m and DGEN.EXE vers. 4.0.6.12.

#### **confi.ini**

The right items in the confi.ini are very important to make the campaign run without problems.

[DGen]  
RandomFlights=2  
NoAirfieldHighlight=1  
MissionDistance=75  
MaxBomberSkill=0  
MaxFLAK=10

#### **Briefings**

The new Briefings are coming with the files

- MessageDe.dat (German language)
- MessageEn.dat (englisch language)

They are packed in a separat zip file called briefings.zip. Backup the old files and copy the new ones into the DGEN folder of Il-2 Sturmovik.

I strongly recommend the to update your message/briefing files from time to time with the corrected briefing files from Vincent Trelut, you can find them here:

<http://www.mission4today.com/index.php?name=Downloads&file=details&id=2615>

The new message files will be part of this patch from Vincent in the future.

## Skins

A great immersion factor for me are the right skins. I put some skins into this package:

Just copy the skins into the folders mentioned above. When you unzip the package they are directed into the right folders.

*None of the skins are made by me. I collected them from the www.*

*Some of the skins are from CanonUK, RDDR, Imme, Emel, jocko, Mangas, Claymore, Kirstorf, VP-Media, but the others i don't know.*

*Thank to all skimmers for their great work!*

**The skins are not necessary to get the campaign running, but they do a lot of immersion.**

You can even add your own skins to the campaign, just take a glance on the following files:

- channel41.db
- channel42.db
- channel43.db
- channel43W.db
- channel\_44.db

In each file you'll find the „Squadrons“ section:

```
[Squadrons]
I_JG2 FW_190A4
skin:Fw-190A-4_Hannig_JG2_Blank.bmp
II_JG2 FW_190A4
skin:Fw-190A-4_Hannig_JG2_Blank.bmp
```

Here you can edit the skins.
